

MISSION BRIEFING

Early-career cybersecurity professional with a strong foundation in offensive security, vulnerability assessment, and penetration testing methodologies. Hands-on experience in identifying, exploiting, and documenting security weaknesses across web applications, networks, and Bluetooth-enabled IoT devices through labs, academic projects, and independent research. Actively developing custom security tools and maintaining a focused learning trajectory toward VAPT and red-team operations.

TECHNICAL EXPERIENCE & PROJECTS

Security Researcher & Tool Developer

OCT 2023 – PRESENT

Independent Projects (Open Source / GitHub)

- Designed and developed **BlueDucky**, a Python-based IoT exploitation framework targeting Bluetooth HID vulnerabilities, including CVE-2023-45866, demonstrating risks of unauthenticated keystroke injection and device impersonation.
- Conducted controlled proof-of-concept attacks to validate exploit feasibility and document real-world security impact.
- Built **WikiCrawler**, an OSINT automation tool using bi-directional BFS logic and AI-assisted entity correlation to support reconnaissance and relationship mapping.
- Followed responsible disclosure principles and secure coding practices while developing modular, reusable tooling for learning and research purposes.

Penetration Testing Analyst (Training & Labs)

2023 – 2024

Connecting Cyber Networks Institute

- Performed end-to-end penetration testing simulations in lab environments, including reconnaissance, scanning, enumeration, exploitation, and post-exploitation analysis.
- Used tools such as **Nmap**, **Metasploit**, **Burp Suite Professional**, **Hydra**, and **Wireshark** to identify common vulnerabilities.
- Assessed web applications against OWASP Top 10, identifying issues such as SQL Injection, Cross-Site Scripting (XSS), and authentication flaws.
- Prepared structured vulnerability reports covering findings, risk severity, exploitation steps, and remediation guidance.

LEADERSHIP & VOLUNTEER EXPERIENCE

Regional Coordinator

PRESENT

Robin Hood Army – Bhandup–Mumbra Region

- Coordinating food collection and distribution activities under a zero-funds operational model.
- Managing volunteer scheduling and execution of weekly drives across multiple locations.
- Supporting educational initiatives under Robin Hood Academy by assisting children transitioning into formal schooling.

TECHNICAL ARSENAL

Exploitation & Scripting

Python (Exploits) Bash / Shell
Metasploit Burp Suite Pro
Hydra John the Ripper

Reconnaissance & Network Analysis

Nmap Wireshark
Aircrack-ng
OSINT Techniques

Platforms & Environments

Kali Linux Parrot OS
Linux Internals Docker
Virtual Labs

EDUCATION

B.Sc. Computer Science

NES Ratnam College
Graduated: Oct 2024

Relevant Coursework: Network Security, Cryptography, Cyber Forensics, Operating Systems, DBMS

CERTIFICATIONS

CEH

Certified Ethical Hacker

CCNA

Cisco Certified Network Associate

LANGUAGES

English Hindi Marathi
