

PROFESSIONAL SUMMARY

Highly motivated Network Support Executive with hands-on enterprise production support experience and rigorous CCNA & CEH training. Specialized in securing wireless network boundaries, troubleshooting RADIUS authentication/captive portal environments, and managing multi-vendor firewalls (Palo Alto, Check Point, Cisco ASA). Proficient in policy configuration, NAT/PAT rules, Access Control Lists, vulnerability assessment, and syslog/threat monitoring. Seeking to apply practical network security and firewall engineering skills in an enterprise security team.

PROFESSIONAL EXPERIENCE

Microsense Networks Private Limited MAY 2026 – PRESENT
Network Support Executive (Deployed at ITC Grand Central Hotel)

- Support a live, high-traffic enterprise network, ensuring network security and uptime for hospitality operations.
- Troubleshoot guest captive portal issues, diagnosing authentication and login failures against corporate RADIUS servers.
- Perform packet capturing and analysis using Wireshark to isolate network anomalies, latency, and rogue traffic.
- Coordinate deployment and validation of wireless access points, ensuring correct VLAN segmentation and access controls.
- Document security and network incidents, and escalate advanced routing or firewall policy issues to senior engineers.

SECURITY LABS & RESEARCH

Multi-Vendor Firewall & Security Lab TECHNICAL IMPLEMENTATION
Security Policy Design & Firewall Hardening

- Configured and managed security policies, static/dynamic NAT/PAT, and ACLs on Palo Alto, Check Point, and Cisco ASA firewalls.
- Implemented URL filtering, user authentication, security profiles (IPS/IDS), and logging/syslog alerting.
- Deployed active/passive High Availability (HA) failover clusters to validate network resilience and failover times.

IoT Vulnerability Research & Traffic Analysis ONGOING RESEARCH
Vulnerability Assessment & Custom Tooling

- Researched CVE-2023-45866 using the BlueDucky framework, demonstrating keystroke injection vulnerabilities on Android/Linux.
- Developed a custom Python script using Scapy for real-time deep packet analysis to detect SYN floods and clear-text credentials.
- Conducted reconnaissance, scanning, and OWASP Top 10 web app testing using Nmap, Metasploit, and Burp Suite.

TECHNICAL ARSENAL

Security & Firewalls

- Palo Alto
Check Point
- Cisco ASA
Security Policies
- NAT / PAT / ACLs
IPSec VPN
- IPS / IDS / URL Filter

Recon & Analysis

- Wireshark
Nmap
- Vulnerability Scan
- Metasploit / Burp Pro
- Syslog / syslog-ng
- Packet Inspection

Development & Ops

- Python (basics)
Ansible (intro)
- Git / GitHub
Linux (RHEL/Kali)
- Docker

EDUCATION

B.Sc. Computer Science
 NES Ratnam College
 Graduated Oct 2024

PROFESSIONAL TRAINING

CEH Training

Connecting Cyber Networks

CCNA Training

Connecting Cyber Networks
