

PROFESSIONAL SUMMARY

Dynamic and detail-oriented Network Support Executive with hands-on enterprise production support experience and rigorous CCNA & CEH training. Specialized in maintaining high-availability wireless infrastructure, troubleshooting complex guest connectivity issues, and managing multi-vendor firewalls (Palo Alto PAN-OS, Check Point Gaia, Cisco ASA). Adept at configuring security policies, NAT, ACLs, and resolving network incidents under SLA constraints. Skilled in Python and Ansible scripting for network operations.

PROFESSIONAL EXPERIENCE

Microsense Networks Private Limited MAY 2026 – PRESENT
Network Support Executive (Deployed at ITC Grand Central Hotel, Mumbai)

- Deliver on-site 24/7 technical support for high-availability enterprise wireless and wired network infrastructure in a fast-paced hospitality environment, adhering to strict SLAs.
- Troubleshoot guest wireless client associations, DHCP lease availability, RF signal coverage issues, and captive portal redirect faults.
- Isolate guest authentication and credential failures against corporate AAA/RADIUS servers integrated with Property Management Systems (Opera PMS).
- Conduct deep packet capture diagnostics using Wireshark and syslog monitoring to analyze network latency, packet loss, and protocol anomalies.
- Coordinate deployment, hardware replacements, local configurations, and verification of wireless Access Points (APs) and local switches (VLANs, trunk ports, Port Security).
- Standardize incident logging and systematically escalate L3 routing or firewall policy conflicts to senior engineering and vendor support teams.

ENTERPRISE INFRASTRUCTURE & AUTOMATION

Simulated Enterprise Network Design (GNS3)

- Designed topologies using Cisco IOS; configured multi-area **OSPF, BGP (EBGP/IBGP), VLANs, trunking (802.1Q), and Inter-VLAN Routing**.
- Configured Spanning Tree (RSTP/MSTP), EtherChannel link aggregation (LACP), and HSRP for gateway redundancy.
- Automated daily device configuration backups and interface health checks using **Python (Netmiko)** and basic **Ansible** playbooks.

TECHNICAL SKILLS

Networking

- OSPF / BGP
- VLANs / STP / RSTP
- Inter-VLAN Routing
- Enterprise Wi-Fi
- RADIUS / Captive Portal
- DHCP / DNS
- HSRP / EtherChannel

Firewalls & Security

- Palo Alto (PAN-OS)
- Check Point (Gaia)Cisco ASA
- Security Policies
- NAT / PAT / ACLsIPSec VPN
- IPS / IDS / URL Filter
- Vulnerability Scan

Tools & Platforms

- Linux (RHEL/Kali)
- Wireshark / Tcpdump
- Python (Netmiko/Scapy)
- Ansible (intro)Git / GitHub
- Docker

LANGUAGES

- English
- Hindi
- Marathi

FIREWALL & SECURITY IMPLEMENTATION LABS

Multi-Vendor Security Gateway Deployments

- Configured security policies based on App-ID and User-ID on Palo Alto (PAN-OS) firewalls, utilizing URL filtering and Active/Passive HA failover.
- Administrated Gaia OS gateways using Check Point SmartConsole, configuring ClusterXL HA, static/dynamic NAT rules, and IPSec site-to-site VPN tunnels.
- Implemented Cisco ASA CLI configurations: interface security levels, Object NAT/ Twice NAT, ACLs, site-to-site VPNs, and AnyConnect VPNs.
- Captured syslog patterns and hardened management plane access via SSH ACLs.

SECURITY RESEARCH & CUSTOM TOOLING

Vulnerability Assessment & Python Scripts

- Researched Bluetooth HID peering vulnerabilities (CVE-2023-45866) using the BlueDucky framework to verify injection impacts.
- Developed a Python Scapy traffic sniffer to detect and log SYN floods and clear-text credential transmissions.
- Tested simulated environments using Nmap vulnerability scanning and Burp Suite Pro.

VOLUNTEER EXPERIENCE

Robin Hood Army

DEC 2023 – PRESENT

Regional Coordinator (Bhandup–Mumbra Region)

- Coordinate volunteer distribution drives and food collection logistics, managing a team of 30+ volunteers in a zero-funds local distribution model.
- Schedule shifts across regional hubs, resolving logistics bottlenecks to ensure weekly food distribution completion.
- Support educational initiatives under the Robin Hood Academy, teaching street children basic Math, English, and Science.

EDUCATION

B.Sc. Computer Science
NES Ratnam College
Graduated Oct 2024

PROFESSIONAL TRAINING

CCNA Training
Connecting Cyber Networks

CEH Training
Connecting Cyber Networks

LAB SOFTWARE & TOOLS

GNS3

Packet Tracer

VMware ESXi

VirtualBox

SmartConsole

ASDM CLI

Kali Linux

Ansible Engine

Netmiko

Scapy Sniffer

Wireshark

Additional tools and frameworks used in the lab environment include: Wireshark, Nmap, Burp Suite, Metasploit, and various Python libraries for network automation and analysis.
