

PROFILE SUMMARY

Detail-oriented Computer Science graduate with CCNA and CEH certifications and strong hands-on exposure to networking, security fundamentals, and Linux administration through structured labs and academic projects. Experienced in configuring routing protocols, VLANs, NAT, ACLs, and basic VPNs in simulated enterprise environments. Actively developing skills in network troubleshooting, traffic analysis, and automation using Python and Ansible. Seeking an entry-level role in network or security operations where fundamentals, discipline, and continuous learning are valued.

TECHNICAL EXPERIENCE & PROJECTS

Security Operations & Network Lab

ONGOING

Connecting Cyber Networks Institute

- Hands-on configuration and troubleshooting of switching and routing concepts aligned with CCNA curriculum in controlled lab environments.
- Performed packet-level traffic analysis using **Wireshark** to identify latency issues, abnormal traffic patterns, and common network misconfigurations.
- Practiced firewall concepts including rule creation, NAT, and access control using **Cisco ASA** and simulated **Check Point / Palo Alto** lab setups.
- Conducted basic vulnerability scanning and reconnaissance exercises as part of CEH-aligned training modules.

Network Infrastructure Lab

ACADEMIC PROJECT

Enterprise Network Simulation – Cisco IOS & RHEL

- Designed and implemented a multi-router enterprise-style topology using **OSPF** for internal routing and **BGP** for external route exchange.
- Configured VLANs, inter-VLAN routing, static and dynamic NAT/PAT, and extended ACLs to enforce traffic segmentation and security policies.
- Implemented IPSec site-to-site VPN tunnels in a simulated WAN scenario to ensure secure data transmission.
- Automated repetitive configuration tasks using Python and Ansible, improving consistency and reducing manual configuration effort.

LEADERSHIP & VOLUNTEER EXPERIENCE

Regional Coordinator

PRESENT

Robin Hood Army – Bhandup–Mumbra Region

- Coordinating food collection and distribution operations in a zero-funds model, serving large groups of underprivileged individuals.
- Managing and scheduling volunteers across multiple locations, ensuring timely execution of weekly drives.
- Supporting Robin Hood Academy initiatives by facilitating basic education and transition support for street children entering formal schooling.

TECHNICAL SKILLS

Networking Fundamentals

OSPF/BGP (lab) VLANs
Inter-VLAN Routing
DHCP/DNS (basics)

Security Basics

ACLs NAT / PAT
IPSec VPN (site-to-site)
Firewall (Cisco ASA)

Tools & Platforms

Cisco IOS Linux (RHEL)
Wireshark Nmap
Python (basics) Ansible (intro)
Git

EDUCATION

B.Sc. Computer Science

NES Ratnam College
Graduated Oct 2024

CERTIFICATIONS

CCNA

Cisco Certified Associate

CEH

Certified Ethical Hacker

LANGUAGES

English Hindi Marathi
